**Subject:** [External] No for Rate Increase for Charleston, SC residence

Good morning: To whom it may concern:

I am writing to voice my concern to dispute the increase of rates by Dominion Energy. They took over SCE&G in a global pandemic and now attempting to raise rates significantly, by 7.7%, our households have all been struggling financially. Now is not the time. We as a community are voicing our opinions loudly.

If this rate is raised, our community will collectively take action to transition current neighborhood customers to alternative energy sources swiftly. We will also create a video that shows this transition and how it empowers us to have the choice to be better than SCE&G.

All of our neighbors are against this increase.  
Please prevent this from happening again. We look forward to your response and feedback.

Regards,

Maggie
